

Prestige 300

Powerful, Dependable and Portable

The Prestige 300 is a **self-contained mixing, pumping and spraying machine**. The heart of the 300 is a Yanmar / Lombardini 3 cylinder industrial duty diesel motor, this power plant is indestructible! The diesel motor powers an all hydraulic drive system, which also includes its own intercooler to keep the hydraulic fluid nice and cool. The combination of a powerful motor and a well designed hydraulic system means that the Prestige 300 can **mix, pump, and spray all at the same time**. It even has an on-board 2,000psi pressure washer for fast, efficient clean up.

The **hydro-electric controls are linked together by an onboard computer** which greatly simplifies operating the pump, and also provides a LED diagnostic read out panel to assist with any maintenance issues. The controls are all at your finger tips...operators get the hang of this pump real fast!

QUICK SPECS	Prestige 300
Motor	Yanmar/Lombardini 3 cyl.
Horsepower	20-23
Pumping system	2L6 rotor/stator
Flow rate	0 - 15 GPM or 4.5 CYPH
Max. pumping pressure	580 PSI
Max. aggregate size	1/4" std. 3/8" w / options
Pipe outlet	50 mm
Hopper capacity	8 CF
Mixer batch output	6 CF
Mixer system	Intergrated hydraulic drive/dump
Compressor output	14 CFM @ 45 PSI
Weight (palletized)	1,590 (1,800) Lbs.
OPERATING DIMENSIONS (palletized)	
Length	132" (103")
Width	53" (60")
Height	54" (60")

COMPLETE

Ready to go when you uncrate the unit...comes complete with a 100 ft. length of hose and a gun kit so you can start working immediately.

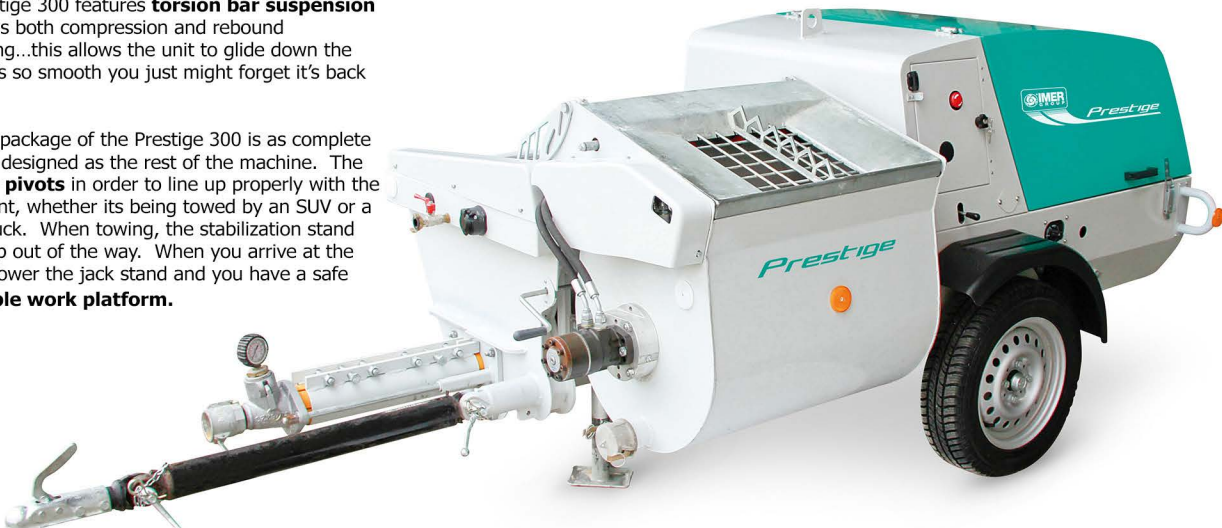

CONVENIENCE

The Prestige 300 comes complete with a **wired remote** so that control from the end of the hose back to the pump is quick n' easy.

PORTABILITY

The Prestige 300 features **torsion bar suspension** which has both compression and rebound damping...this allows the unit to glide down the road. It's so smooth you just might forget it's back there.

The tow package of the Prestige 300 is as complete and well designed as the rest of the machine. The **tow bar pivots** in order to line up properly with the hitch point, whether its being towed by an SUV or a dump truck. When towing, the stabilization stand cranks up out of the way. When you arrive at the jobsite, lower the jack stand and you have a safe and **stable work platform**.

The control panel is simple yet intelligent.

The hydraulic mixer provides plenty of well mixed material, even at the highest pumping speeds.

Hydraulically driven pressure washer comes standard.
